Joann:

This facsimile is being sent to notify Integrated and Boeing that soil from the Hollywood and Highland site is acceptable for import to Lots 13 and 14 for use as backfill material. This acceptance is based on the analytical results supplied to PES and Frito-Lay by Integrated and is limited to soil in the vicinity of soil sample Nos. S4 and S6. We understand that the soil to be excavated in the vicinity of these soil samples is approximately 10,000 cubic yards. Frito-Lay has indicated to PES that the cost for the import soil is acceptable. Please call if you have any comments or questions.
